ECECS UESTC2029/UESTCHN2005
Written Assignment Student Tasksheet

Aims

This assessment is linked to the following course aims:

- develop critical analytical skills when reading scientific and engineering documents
- develop the skills to present information of a technical nature in written communication clearly and concisely
- develop academic research skills for engineers

Course ILOs

This assessment is designed to show evidence of meeting the following intended learning outcomes:

- search for, evaluate and select relevant information from printed and online resources
- produce clear and concise technical documents/reports using appropriate, discipline-specific language, style and referencing conventions
- analyse issues related to the Grand Challenges in engineering

AHEP 4 Coverage

This assessment works towards meeting the following AHEP 4 criteria:

- **C4:** Technical literature - Select and evaluate technical literature and other sources of information to address complex problems
- **C7**: Sustainability - Evaluate the environmental and societal impact of solutions to complex problems and minimise adverse impacts
- **C11**: EDI - Adopt an inclusive approach to engineering practice and recognise the responsibilities, benefits and importance of supporting equality, diversity and inclusion
- **C17**: Communicate effectively on complex engineering matters with technical and non-technical Audiences

This assessment constitutes **20%** of your final course grade.

SCENARIO:

You are currently engaged on an internship. This involves a project on a topic related to the NAE Grand Challenge “Restore and improve urban infrastructure” and requires a **written report** as a project output. In your internship application you were asked to choose a location and issue to investigate.

Now it is time to move on with your research and produce a report on this topic.

Your report should explain the key issue relating to your chosen locality, explore solutions and identify the specific solution that you consider the best fit for that location. Project leaders from the company will read your report, but it may also be shared with stakeholders from your chosen locality, some of whom are not engineers.

TASK:

Write a report with reference to relevant literature, identifying and describing an issue related to urban infrastructure which impacts a specific locality. Explain and evaluate two engineering approaches that have potential to address this issue. Identify which approach is most appropriate for the locality and explain why.

You must write your report in a way that ensures readers who are not engineering specialists can understand it.
You must work individually on this assignment and submit an individual report. The report **must be your own work.**

Your report **must**:

- identify and explain the issue in relation to the locality
- explain **two** engineering approaches to resolving the issue
- evaluate these approaches and identify the best approach for the locality
- explain why this is the best approach

In this report you **must**:

- use the **two sources provided** (a lecture and a book chapter on the overall topic)
- use **one** or **two** other appropriate written sources to support information about the locality, and **one** or **two** further written sources for **each** solution you investigate*
- include an **Abstract**
- include appropriate **in-text citations** in **IEEE style**
- provide a full and accurate **reference list** in **IEEE style**
- provide PDF copies of **all written sources** used in your report **except** the two sources provided.

* The **minimum** number of sources to be used is **five** (the two provided sources, one source about the locality, and one source for each of the two solutions). The maximum number of sources is **eight** (the two provided sources, two sources about the locality, and two sources for each of the two solutions).

All sources must be **originally published in English**. You **must not translate** Chinese or foreign language sources.

Your project **must not** be based on any location with a specific urban infrastructure issue which is mentioned in the **given sources** (e.g., flooding in Chinese cities which are part of the Sponge City initiative, mentioned in the Permana (2025) chapter). However, you could investigate an issue mentioned in the sources for a different location or investigate a location that is mentioned but focus on a different issue.

You should also **not** base your project on an issue which already has a solution in your chosen location, unless that solution has failed and you are identifying an alternative solution.

All of the following are assessed: the abstract, the main body of the text, the submission of sources and the reference list.

The word count of the main body of the text is **1,000 words (+/-10%)**. The word count for the Abstract is **100 to 150 words**. The reference list is **not** included in these word counts.

Formatting

Font: Arial **bold** 12pt for headings + subheadings; Arial 11pt for body of text

Spacing: **1.5** spacing

Visuals: You should only include visual information if necessary. If doing so, make sure you reference this appropriately using IEEE style

Cover page: Include a **cover page** with name (in Pinyin), UESTC ID, Assignment Title and word count. All writing on this page must be in Arial 14pt.

ENGAGEMENT

In addition to writing your report, you must engage with the research and writing process. The requirements are covered by three Check-in points:

1. **Week 6 tutorial.**
   Prepare to discuss your Project idea, the location and the issue in advance of your tutorial.
   Complete the tutorial preparation form in advance of your tutorial.
   Attend your tutorial.
   Engage in discussion with your tutor about your Project proposal.

2. **Week 7 – CS 10**.
   Find a relevant source for your Project in advance of this Class Session 10.
   Submit the source text to Moodle by **11pm on Sunday Week 6 (12th April).**
   Prepare to discuss the source text.
   Bring a hard copy of the source text to **CS 10**.
   Engage in discussion about the relevance of the source text.

3. **Week 11 tutorial**.
   Prepare a plan for your report in advance of your tutorial.
   Submit the plan to Moodle by **11pm Sunday Week 10 (10th May)**.
   Bring the plan to the tutorial.
   Engage in discussion with your tutor about the plan.

REPORT SUBMISSION

- The report submission deadline is **Tuesday 19th May 2026** at **11pm (CN)**
- Your report is submitted through Turnitin (Tii)
- Name your file in this way: WA_group_SurnameFirstname eg **WA_CE4A_WangJiangqin**
- Upload one PDF file to Moodle: **Written Assignment FINAL ASSESSED VERSION**
- Also submit a **zipped file of your sources**, which should be in **PDF format**.

Checking similarity scores

- You may also use the **Written Assignment draft (not assessed)** to check your report in Tii. (You must name this draft file in exactly the same way as your final version.) Do not submit any of your sources to the draft area.
- You must check your submission is **uploaded successfully** immediately after you submit. You must also check that you have submitted the **correct, final version** of your report, and submitted it in the **FINAL ASSESSED VERSION**. See the PDF **Screenshots of submitting an assessed assignment on Moodle** in the Assessments section on Moodle. You must press **submit** and click on the **Originality declaration**.
- **Late submissions** receive standard penalties in accordance with UofG regulations
  - 2 UofG points are deducted for each day late, up to 5 working days

for submissions more than 5 working days late, the submission receives an H grade.

ASSESSMENT AND GRADING

This assessment constitutes **20%** of your final course grade.

The written assignment is graded using the University of Glasgow Schedule A. The assignment receives one overall grade. the following grades will be awarded:

A1 – A5	Excellent
B1 – B3	Very Good
C1 – C3	Good
D1 – D3	Satisfactory
E1 – E3	Weak
F1 – F3	Poor
G1 – G2	Very poor
H	No evidence

The assignment is assessed against 4 criteria which are equally weighted:

- engagement
- task achievement
- research skills
- language and organisation

Detailed assessment descriptors are available on Moodle. To meet the course requirements, you must achieve a **minimum of D3/9** in this assessment.

ACADEMIC INTEGRITY and AI statement

You **must not generate work for this assessment using AI**. This counts as academic misconduct. Your work must evidence *your* English language and communication skills. Please see the Student Handbooks for further detail.

All suspected cases of plagiarism and/or collusion will be investigated. This includes direct lifting from sources, copying work from other students and the use of translation and AI tools. **No grade** will be awarded while the investigation is in progress.

COURSE REQUIREMENTS

Please remember that you must complete and submit this assessment in order to meet the course requirements. To meet the course requirements, you must achieve a **minimum of D3/9** in this assessment.

There is one resit opportunity for this assessment, but a resit assessment is capped at D3/9.

Written Assignment Marking Criteria (General Descriptors)

Engagement with Process	Task Achievement (includes Content)	Research Skills	Language & Organisation
• work in preparation for tutorials • attendance at tutorials in Week 6 and Week 11. • preparation to discuss project (location and issue) in Week 6 tutorial • week 7 source prepared and brought to class session • discussion of source text in Week 7 • plan of report for discussion in Week 11 tutorial • submissions of Week 7 text source and report plan	• a relevant area of focus relating to a locality and the given challenge • explanation of the issue • 2 engineering approaches to solving the issue explained and evaluated • 1 approach identified as optimum for the issue and locality • the 2 provided sources referred to • 3-6 additional sources referred to, as per task instructions • the 3-6 additional source texts submitted • sections included: abstract, main text and reference list • meets word count requirements (both text and abstract) • effect on the reader	• English language source texts • appropriacy of sources: relevant to topic, reliable, academic whenever possible • appropriate use of sources: to provide information, to support points • cited information available in source texts • paraphrasing skills, adherence to appropriate academic practice* • citation and referencing skills, following IEEE style	• appropriate academic style • written for a non-specialist audience • use of own language* • range of vocab and grammar • accuracy of vocab and grammar • coherence: flow and clarity of ideas • cohesion: linking within and across sentences and paragraphs • appropriacy of organisation: paragraph, section and overall structure • layout: section headings, paragraphing, inclusion of word counts • formatting: spacing, font (size), punctuation

Detailed Descriptors

	Excellent Grade awarded: **A2/21**	**Very good** Grade awarded: **B2/16**	**Good** Grade awarded: **C2/13**
Engagement (See bullet points above for overview)	• fully engages with the planning and writing process. • comes to check in points extremely well-prepared. • brings required materials to check in points. • engages fully in Check-In class and tutorial discussions • submits source text and planning doc by required deadlines.	• engages very well with the planning and writing process. • comes to Check-In points well-prepared. • brings required materials to check in points. • engages well in Check-In class and tutorial discussions • submits source text and planning doc by required deadlines.	• engages with the planning and writing process. • comes to check in points prepared. • brings required materials but these may not be fully relevant. • engages in Check-In class and tutorial discussions but this is inconsistent • submits source text and planning doc but this may be after required deadlines.
	Satisfactory Grade awarded: **D3/9**	**Weak** Grade awarded: **E2/7**	**Poor** Grade awarded: **F2/4**
	• engages with the planning and writing process satisfactorily. • comes to check in points but is not very prepared or misses one Check-In. • fails to bring required materials to **one** Check-In point. • engagement in Check-in class and tutorial discussions is satisfactory • fails to submit 1 of required docs or after required deadline. Submits source text and planning doc on time.	• does not engage with the planning and writing process to a satisfactory standard • comes to Check-in points without preparation and/or misses a check in point. • does not bring required materials to Check-in points. • engagement in Check-in class and tutorial discussions is weak/below standard. • does not submit source text and planning doc on time.	• poor engagement with the planning and writing process. • does not prepare for check in points and may miss a Check-in point. • does not come to check in points with required materials • fails to engage appropriately in Check in class sessions + tutorial discussions • fails to submit source text and planning doc

ECECS 2029/HN2005 WRITTEN ASSIGNMENT Marking Criteria

	Excellent (A1-A5) Descriptor for A3	**Very good (B1-B3)** Descriptor for B2	**Good** Descriptor for C2
Task Achievement (See bullet points above for overview)	• all task requirements fully met • information throughout is extremely relevant • the overall effect on the reader is extremely positive	• almost all task requirements fully met • information throughout is relevant • the overall effect on the reader is very positive	• most task requirements met • information is mainly relevant but includes occasional irrelevant/missing information • the overall effect on the reader is positive
	Satisfactory (D1-D3) Descriptor for D2	**Weak (E1-E3)** Descriptor for E2	**Poor (F1-F2** Descriptor for F2
	• most task requirements met • information is generally relevant but there is some irrelevant/missing information • the overall effect on the reader is satisfactory	• some task requirements not satisfactorily met or not attempted • quite a lot of irrelevant/missing information • the overall effect on the reader is weak • difficult to assess	• few task requirements met • substantial irrelevant/missing information • the overall effect on the reader is poor • very difficult to assess.

*You must not generate work for this assessment using AI, plagiarise from sources, or collude with other students to copy work from each other. All of these count as academic misconduct. Your work must evidence *your* English language and communication skills.

All suspected cases of plagiarism and/or collusion will be investigated. This includes direct lifting from sources, copying work from other students and the use of translation and AI tools. Please see the Student Handbooks for further details.

No grade will be awarded while the investigation is in progress.

ECECS 2029/HN2005 WRITTEN ASSIGNMENT Marking Criteria

	Excellent (A1-A5) Descriptor for A3	**Very good (B1-B3)** Descriptor for B2	**Good (C1-C3)** Descriptor for C2
Research Skills (See bullet points above for overview)	• all sources are highly relevant to the topic and academic • all sources provide relevant information and effectively support the points made • all citations found in sources cited • highly effective paraphrasing • in-text citations and reference list entries follow IEEE throughout	• all sources are relevant to the topic and academic • almost all sources provide relevant information and support the points made • all citations found in sources cited • very effective paraphrasing • in-text citations and reference list entries follow IEEE throughout	• almost all sources are relevant to the topic and academic • most sources provide relevant information and support the points made, but not fully • most citations found in sources cited • mainly effective paraphrasing • in-text citations and reference list entries mainly follow IEEE
	Satisfactory (D1-D3) Descriptor for D2	**Weak (E1-E3)** Descriptor for E2	**Poor (F1-F2** Descriptor for F2
	• the majority of sources are relevant to the topic and academic • attempt to use sources which provide relevant information and support the points made, but this is inconsistent • some citations difficult to find in sources cited • satisfactory paraphrasing, but there may be some errors in meaning/clarity or lack of paraphrasing techniques • in-text citations and reference list entries mainly follow IEEE	• some sources are relevant to the topic and/or not academic • some sources do not provide relevant information and/or support the points made • some citations very difficult to find in sources cited • few attempts to paraphrase • lack of and/or inappropriate use of in-text citations; reference list entries do not follow IEEE • difficult to assess	• sources are mainly irrelevant to the topic and/or not academic • sources do not provide relevant information and/or support the points made • some citations cannot be found in sources cited • very little paraphrasing • missing and/or inappropriate use of in-text citations; reference list entries do not follow IEEE • very difficult to assess

ECECS 2029/HN2005 WRITTEN ASSIGNMENT Marking Criteria

	Excellent (A1-A5) Descriptor for A3	**Very good (B1-B3)** Descriptor for B2	**Good** Descriptor for C2
Language and organisation (See bullet points above for overview)	• very clearly written for intended reader • very wide range of relevant language, written in academic style throughout • very high level of accuracy, minor errors do not affect comprehension • flows extremely well and Intended meaning fully clear • excellent organisation at paragraph and in overall structure • cohesion maintained throughout, with very appropriate/sophisticated use of cohesive devices • layout & formatting extremely accurate and professional	• clearly written for intended reader • wide range of relevant language, written in academic style throughout • high level of accuracy, minor errors rarely affect comprehension • flows well and Intended meaning generally very clear • very good organisation at paragraph and in overall structure • cohesion maintained throughout, with appropriate and sometimes sophisticated use of cohesive devices • layout & formatting accurate and professional	• written for intended reader • good language range, mainly relevant & written in academic style • good level of accuracy, some errors which may affect comprehension • flows quite well and intended meaning generally clear • good organisation at paragraph level and in overall structure, inconsistent. • cohesion mostly maintained, with generally appropriate use of cohesive devices • layout & formatting generally accurate but inconsistent
	Satisfactory (D1-D3) Descriptor for D2	**Weak (E1-E3)** Descriptor for E2	**Poor (F1-F2** Descriptor for F2
	• not clearly written for intended reader • adequate language range, not always written in academic style • adequate level of accuracy but errors sometimes affect comprehension • satisfactory flow but Intended meaning lacks clarity in places • satisfactory organisation at paragraph level /overall structure, but inconsistent. • cohesion not always maintained, with attempts at cohesive devices not always successful • layout & formatting generally accurate but inconsistent	• not written for intended reader • limited language range, not written in academic style • low level of accuracy, with errors often affecting comprehension • does not flow well and lacks clarity in places • cohesion not maintained, with little evidence of appropriate cohesive devices • layout & formatting not satisfactory, unprofessional • difficult to assess	• not written for intended reader • very limited language range, not written in academic style • many errors making comprehension very difficult • poor organisation at paragraph level and in overall structure • cohesion not maintained, with very little evidence of appropriate cohesive devices • layout & formatting poor, unprofessional • very difficult to assess
