

ECECS UESTC2029/UESTCHN2005
Group Presentation
Student Tasksheet 2026

Course Aims

This assessment is linked to the following course aims:

- develop key language and communication skills for prospective engineers
- develop critical analytical skills when reading scientific and engineering documents
- develop the skills to present information of a technical nature in oral communication clearly and concisely
- develop academic research skills for engineers

ILOs

This assessment is designed to show evidence of meeting the following intended learning outcomes:

- search for, evaluate and select relevant information from printed and online resources
- deliver oral presentations of a technical nature, incorporating effective visual aids
- work effectively in a team on a literature-based research task
- analyse issues related to the Grand Challenges in engineering

AHEP 4 Coverage

This assessment works towards meeting the following AHEP 4 criteria:

- **C4:** Technical literature - Select and evaluate technical literature and other sources of information to address complex problems
- **C7:** Sustainability: Evaluate the environmental and societal impact of solutions to complex problems and minimise adverse impacts
- **C11:** EDI: Adopt an inclusive approach to engineering practice and recognise the responsibilities, benefits and importance of supporting equality, diversity and inclusion
- **C16:** Teamwork - Function effectively as an individual, and as a member or leader of a team
- **C17:** Communicate effectively on complex engineering matters with technical and non-technical audiences

SCENARIO:

You are currently engaged on an internship. You have been asked by your supervisor to deliver a presentation with one other intern* on the theme of your internship research project for a networking event that the company is running. The audience will be non-specialists from other organisations. Your presentation is for a maximum of **10 minutes** (with an additional **four** minutes for questions and answers) and must be of interest and engaging to a general audience.

** Depending on student numbers, you may be asked to work in a three instead of a pair. Your teacher will provide you with an alternative time allocation in this situation.*

TASK:

This presentation involves both individual work and collaboration.

Each presenter must speak for **three minutes** on their individual research topic. This is tied to the internship and is on the theme of a Grand Challenge for engineering. It is the same topic that you wrote about for your Written Assignment.

Following the individual turns, each presenter must speak for an additional **two minutes** about their partner's topic and how it relates to their own. This is not an evaluation of the partner's research, but a reflection. You could talk about:

- the similarities and/or differences between your projects
- what you have learned from each other's research
- ideas for taking each other's research forward

This means you need to collaborate to prepare the presentation and build an understanding of each other's work.

The overall structure will be:

1. **Presenter 1** explains their research project, including the location and issue they identified, the solutions they investigated, and why they chose their specific solution.* **(3 minutes)**
2. **Presenter 2** repeats Step 1 about their own project. **(3 minutes)**
3. **Presenter 1** reflects on the topic of Presenter 2. **(2 minutes)**
4. **Presenter 2** reflects on the topic of Presenter 1.** **(2 minutes)**
5. **Both presenters** respond to questions from the audience **(4 minutes)**

* This stage involves explaining your project in a different way than you did in your written assignment. You will need to select relevant information from the project and explain it in a spoken presentation style which engages your audience, using slides to support your explanation as appropriate.

** Collaboration on steps 3 & 4 is essential to ensure both presenters do not simply repeat the same points. Each turn here should be a personal response to your partner's project.

You must deliver the presentation using accompanying slides (e.g. PPT).

Additional details:

- You must work **collaboratively** throughout the preparation and delivery of the presentation.
- All source material (including images) must be appropriately referenced, using IEEE referencing style.
- The first slide should contain your **full names** and **university email addresses** (UofG or UESTC).
- When designing your slides, you should consider how they can best enhance and complement your presentation.
- Your presentation must **not** include any video or other animated content.
- You may bring notes to support you in your presentation. However, you are not allowed to bring a script on paper or on any electronic devices.

Group Presentation Guidance

All students must follow this guidance.

Assessment Arrangements

The presentation assessment takes place in **Week 16**. This is a **compulsory summative assessment**: all students must take part to fulfil the course requirements.

- Your teacher will tell you who you will be working with and when your assessment will take place.
- You must attend all assessment sessions for your group as you will form part of the audience when not presenting.
- The presentations are recorded by the assessor as evidence and for moderation purposes.
- You must bring your UofG ID card to the assessment.

Submission of slides

- Prepare slides, including on the first slide: full names and university email addresses (UofG or UESTC) + on the final slide: references to source material (using IEEE referencing style).
- Your group must upload **one set** of your slides to Moodle (**Presentation slides submission + feedback**)
- The slides should be named in this way:
Pres_slides_group_SurnameGivenname1_SurnameGivenname2
eg: Pres_slides_CE3A_WangYiwen_ZhuHanwen
- You must upload your slides to Moodle before the presentation. Your teacher will inform you of the deadline for this.
- The slides uploaded are used for assessment. Any amendments made to slides after uploading will not be considered in your assessment.

Assessment and grading:

- This assessment constitutes **20%** of your final course grade.
- This presentation is double marked (2 assessors).
- You will be assessed **individually** on this presentation. However, how well you collaborate to design and deliver this presentation impacts on your grade.
- The assessment is graded using the University of Glasgow Schedule A. You will receive a final grade, and a breakdown of grades based on the marking criteria.
- Late submission of slides will receive a standard UofG penalty under the presentation criterion of **Content** (2 UofG points for each day late, up to 5 days).
- To meet the course requirements, **you must achieve D3 (60%) overall for speaking**. This is a combined grade for Group Interview and Presentation, but the presentation has a higher weighting. If you do not achieve this overall grade, then you will need to retake the presentation to improve your grade.

The presentation is assessed against 4 criteria:

- task achievement and content
- organisation
- language
- delivery

These criteria are equally weighted. Detailed assessment descriptors are shown below.

Academic Integrity

This is an assessment of your own language and communication abilities.

- You **must** reference all sources appropriately.
- You **must not** copy the work of others, including work taken from the internet.
- You **must not** use AI to generate the content of your presentation or the information on your slides.

Any evidence of plagiarism or academic misconduct (**including evidence that AI has been used to generate any part of your work**) will be investigated and dealt with by the University. Please see the Undergraduate Student Handbook section on Academic Conduct (from page 28) for further information.

Course Requirements

Please remember that you **must** take all summative assessments to fulfil the course requirements.

Failure to take part in this assessment will mean that you do not meet the ECECS Course Requirements and you will have to resit this assessment. While there is a resit opportunity for this assessment, remember that resitting a summative assessment component of the course will also mean that your grade for the course is capped at D3/60%.

If you are aware in advance of any issue that will affect your ability to complete this assessment as required, you should contact the Course Coordinator (Jen MacDougall) in advance. You may be able to apply for Good Cause. For information on this, see the Undergraduate Student Handbook.

To meet the course requirements, you must achieve D3 (60%) as a combined grade for Group Interview and Presentation. If you do not achieve this overall grade, then you will need to retake the presentation to improve your grade.

Additional guidance for this assessment (good practice):

- Make sure you work together during this whole process. The presentation should not be separate presentations.
- Make sure you proofread and edit your slides carefully.
- Make sure you follow the timings in the tasksheet.
- At the end of your presentation, invite your audience to ask questions.
- Do not prepare too much content or you will go over time.
- Practise your presentation together so that you know how long it will take. The assessor will stop you if you go over time.

Frequently asked questions (FAQs)

You can find answers to the most frequently asked questions in an activity on Moodle in the Assessments section. You can also ask questions in the **Lectures in Week 13** and the **Class Sessions in Weeks 14-15**.

Owner of this assessment: Jen MacDougall. If you have any questions, please contact Jennifer.macdougall@glasgow.ac.uk

English Communication and Engineering Career Skills (2029 + HN2005)

Presentation Assessment Criteria

Task Achievement + Content	Organisation	Language	Delivery
Task requirements: • topic is the WA project – focused on a specific location and issue related to a Grand Challenge • an overview of the research, including focus, approaches and evaluation • personal response to partner's research • responding appropriately to questions • delivered for non-specialist audience (e.g., clear definitions and explanations) • evidence of sources of information • slides: names of presenters, references, appropriate number of slides, information that supports the presentation • individual timing	• appropriacy of organisation: sections and overall structure (signposting + transitions) • coherence: flow and clarity of ideas • cohesion: linking within and across ideas • layout and design of slides • collaboration among presenters: handovers, distinct personal responses	• use of own language • range of vocab and grammar, including information on slides • accuracy of vocab and grammar, including information on slides • academic presentation style • spoken language and its features • use of appropriate language for task functions, e.g. describing research, evaluating, reflecting	• engagement of the audience throughout the presentation • preparation + naturalness • speed and pace of speaking • pronunciation (individual sounds, linking sounds, stress and intonation) • presence, eye contact and gestures • use of notes • use of slides

(See bullet points above for what to consider for each criterion)	A1 – A5 Excellent Descriptor for A3	B1 – B3 Very good Descriptor for B2	C1 – C3 Good Descriptor for C2	D1 – D3 Satisfactory Descriptor for D2	E1 – E3 Weak Descriptor for E2	F1 – F3 Poor Descriptor for F2
Task Achievement & Content	All task requirements fully met; the information throughout is extremely relevant; very clearly explained for a non-specialist audience; questions dealt with very effectively	Almost all task requirements fully met; the information throughout is relevant; very clearly explained for a non-specialist audience; questions dealt with very well	Most task requirements fully met; the information is mainly relevant but may include occasional irrelevant information; clearly explained for a non-specialist audience; questions generally dealt with well	Most task requirements met; the information is relevant but includes some irrelevant information; quite clearly explained for a non-specialist audience; attempted to deal with questions;	Some task requirements are not met or not attempted; a good deal of the information is irrelevant; not explained for a non-specialist audience did not deal with any questions or dealt with them poorly; difficult to assess	Few task requirements met; the information is mainly irrelevant; not explained for a non-specialist audience; did not deal with any questions or dealt with them very poorly; very difficult to assess
Organisation	Extremely well structured; very effective use of sophisticated signposting language; very clear flow of ideas/information; clear evidence of excellent collaboration	Very well structured; effective use of signposting language; clear flow of ideas/information; clear evidence of very good collaboration	Well structured; mainly effective use of signposting language; mainly clear flow of ideas/information; evidence of good collaboration	Quite well structured; some effective use of signposting language; some clear flow of ideas/information; some evidence of collaboration	Lacked structure; little use of signposting language; lacked connection between ideas/information; little evidence of collaboration	Little evidence of any structure; little or no use of signposting language; lacked connection between ideas/information; very little or no evidence of collaboration

Language	Demonstrates a very wide range of relevant language; uses own language; delivered in an appropriate academic presentation style throughout; a very high level of accuracy throughout; includes minor errors but they do not affect comprehension	Demonstrates a wide range of relevant language; uses own language; delivered in an appropriate academic style throughout; a high level of accuracy throughout; includes few errors and they rarely affect comprehension	Demonstrates a good range of language; some language sounds copied or overly scripted; mainly delivered in an appropriate academic style; a mainly good level of accuracy; includes some errors and they may affect comprehension	Demonstrates an adequate range of language; language often sounds copied or overly scripted; not always delivered in an appropriate academic style; an adequate level of accuracy; errors sometimes affect comprehension	Demonstrates a limited range of language; language sounds copied or overly scripted; not delivered in an appropriate academic style; a low level of accuracy; errors often affect comprehension; difficult to assess	Demonstrates a very limited range of language; language sounds copied or overly scripted; not delivered in an appropriate academic style; includes so many errors that make comprehension very difficult; very difficult to assess
Delivery	The overall effect on the audience is extremely positive; engages the audience appropriately throughout; natural but well prepared; highly appropriate speed and pace; very clear pronunciation throughout; varied and appropriate	The overall effect on the audience is very positive; engages the audience appropriately throughout; natural but well prepared; appropriate speed and pace; clear pronunciation throughout; varied and appropriate intonation and	The overall effect on the audience is positive; engages the audience appropriately some of the time; quite natural but may be under- or over-prepared with a tendency to sound scripted; appropriate speed and pace at times; mainly clear pronunciation;	The overall effect on the audience is satisfactory; attempts at engaging the audience; may sound unnatural as under- or over-prepared and a tendency to sound scripted; some appropriate speed and pace; some clear pronunciation;	The overall effect on the audience is poor; little attempt at engaging the audience; sounds unnatural as under- or over-prepared (reading script or searching for language); inappropriate speed and pace; mainly unclear pronunciation; monotone;	The overall effect on the audience is very poor; no attempt at engaging the audience; sounds unnatural as under- or over-prepared (reading script or searching for language); inappropriate speed and pace; unclear pronunciation

	intonation and stress throughout; highly appropriate use of notes and slides; excellent presence, eye contact and gestures	stress at times; appropriate use of notes and slides; very good presence, eye contact and gestures	attempts at varied and appropriate intonation and stress at times; mainly appropriate use of notes and slides; good presence, eye contact and gestures	some attempts at varied intonation and stress but not always appropriately; some appropriate use of notes and/or slides; some presence, eye contact and/or gestures	inappropriate use of notes and/or slides; very little presence, eye contact and/or gestures; difficult to assess	throughout; monotone; inappropriate use of notes and slides; complete lack of presence, eye contact or gestures; very difficult to assess
